

Notes:

1. These features to be removed from landfill area prior to completion of soil remedy.
2. Any areas where contaminant concentrations in soil exceed the New Jersey Residential Direct Contact Soil Cleanup Standards require a deed notice or equivalent institutional control.
3. The area to be capped (Alternative 3) or excavated (Alternative 4) was determined based on a risk-based concentration developed as discussed in Appendix B of this Feasibility Study Report.
4. Site Plan created from Arcadis CAD drawings received December 2015.

Legend		
Areas of Particular Concern (to be capped or excavated)	Edge of landfilled wastes (dashed where approximate)	Potential Bog Turtle Habitat Area
Potential Source Area to be Removed	Great Swamp National Wildlife Refuge property boundary	Potential Bog Turtle Habitat Area B
Areas Determined to be Partially Non-Vegetated During Field Inspection	Area to be Capped (under Alternative 3) or Excavated (under Alternative 4)	Waste and debris observed on ground surface but not observed or anticipated below ground surface
Access Control Fence	Blue Spotted Salamander	Wetland
		150-foot Wetland Transition Area
		Open water
